July 2, 2020

Dear Sir or Madam,

With a Bachelor's degree in Information Engineering Technology and hands-on experience using Python languages to create and implement software applications, Confident I will be an asset to your projects and team.

Enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me.

Your listed requirements closely match my background and skills. A few I would like to highlight that would enable me to contribute to your bottom line are:

- * Highly skilled in designing, testing, and developing software.
- * Managing high performance and scalable Applications.
- * Helping and collaborate with team member for self-development and gaining knowledge.
- * Thorough understanding of data structures and algorithms.
- * Knowledgeable of back-end development best practices.
- * Bussiness oriented features to development and production phase.
- * Hands-on software troubleshooting experience.

Proven track record of proper documentation for future maintenance and upgrades. I've attached a copy of my [Summarized resume](#) ([detailed resume](#)) that details my experience in software development. I can be reached anytime via my cell phone or via email.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Sincerely yours,

George Messiha

*DevOps for life, Software Engineer by day, Entrepreneur by night.
Building to make people's life easier. Volunteer by heart. feeding
my eager to learn, implement, create to reach my ultimate
potential. Looking forward to be the Next Game Changer.*

Education

The German University in Cairo

Bachelor of Networks and Information Engineering Technology

Bachelor Thesis Topic: Security of Cloud Computing

Cairo, EG

2011–2016

Saint Fatima International School - Nasr City

Thanwya Amma, Math Science

Cairo, EG

1997–2011

Experience

Orange Business Services

Senior Software Engineer

Cairo, EG

Sep 2018–Present

Building Orange's first automated reporting tool for every service performance and customizing the reports to Customer needs and requirements upon each SLA.

Detailed achievements:

- Help the team to collect relative data for clients on their business, clean data to find the performance and efficiency of the system and the network timing.
- Data modeling, system architecture, data loading from Big data warehouse HortonWorks to kafka and more streaming data tools, to visualize the data in meaningful charts in data analytic reports.
- Tools: Hadoop, Spark, Python, HortonWorks, Django, Jira, Taiga, Continuous Integration, Continuous Delivery, Docker, Docker-Compose, Linux, Power BI, Web Scrawlers, Scrum, Agile DevOps framework

PayMob

Software Engineer

Cairo, EG

Jul 2017–Jul 2018

Building Vodafone Cash Backend.

Detailed achievements:

- Develop, test, debug and maintain cloud based solutions with python, nginx, AWS, Docker technologies.
- Develop unit tests and work with Quality Control members Roles on solving the defects.
- Prepares and installs solutions by determining and designing system specifications, standards, and programming. Embracing, utilizing the new wave of software development concepts (SaaS, Cloud Computing)

Nexus Edge

Remote Software Engineer

Sao Paulo, Brazil

Dec 2017

Developing one of the most cognitive Marketing AI, helping to improve the teams communication, managing the development remotely. Maintaining development cycle.

BlueCloud Technologies

Software Engineer

Cairo, EG

Feb 2017–Jun 2017

Building Docs Sharing Software addons in Microsoft Word. Detailed achievements:

- Develop, test, debug and maintain web/windows cloud based solutions with MS .net technologies.
- Develop unit tests and work with Quality Control members/Roles on solving the defects.
- Prepares and installs solutions by determining and designing system specifications, standards, and programming.
- Embracing and utilizing the new wave of software development concepts (Software-as-a-service, Cloud Computing, ...etc.).

Aprcot

Software Engineer

Cairo, EG

Jun 2016–Jun 2017

Building a tool to automate the Ads campaign for Social media(e.g. Facebook, Google, Instagram, Youtube) instead of registering for each campaign it automates the campaign follow the graph produce a peak notification, choosing the best plane with the best budget to reach the target. all of that is automated using our magnificent tool which use machine learning, AI, Restful and a lot of other applications to reach the campaign target.

Detailed achievements:

- Develop, test, debug and maintain.
- Tools: Bower, Gitlab, Jira, CSS, AngularJS, HTML, Gulp, Django, Rest Framework.

Internships
